

THE SHORT STORY

XL has partnered with workRestart as part of our community awareness commitment.

workRestart is a not-for-profit social enterprise, building a stronger future for prisoners. We have gone behind the bars at Borallon Training and Correctional Centre to provide real jobs and training for offenders.

In conjunction with workRestart, XL operates inside the correction center and employs an inmate workforce to assemble each and every TOOLMASTER™ product, creating training and pathways for employment upon release from the correction centre. Part of the proceeds of each TOOLMASTER™ is given back to workRestart to assist in the workRestart program.

Are you looking for a high quality, robust and secure, tool storage solution?

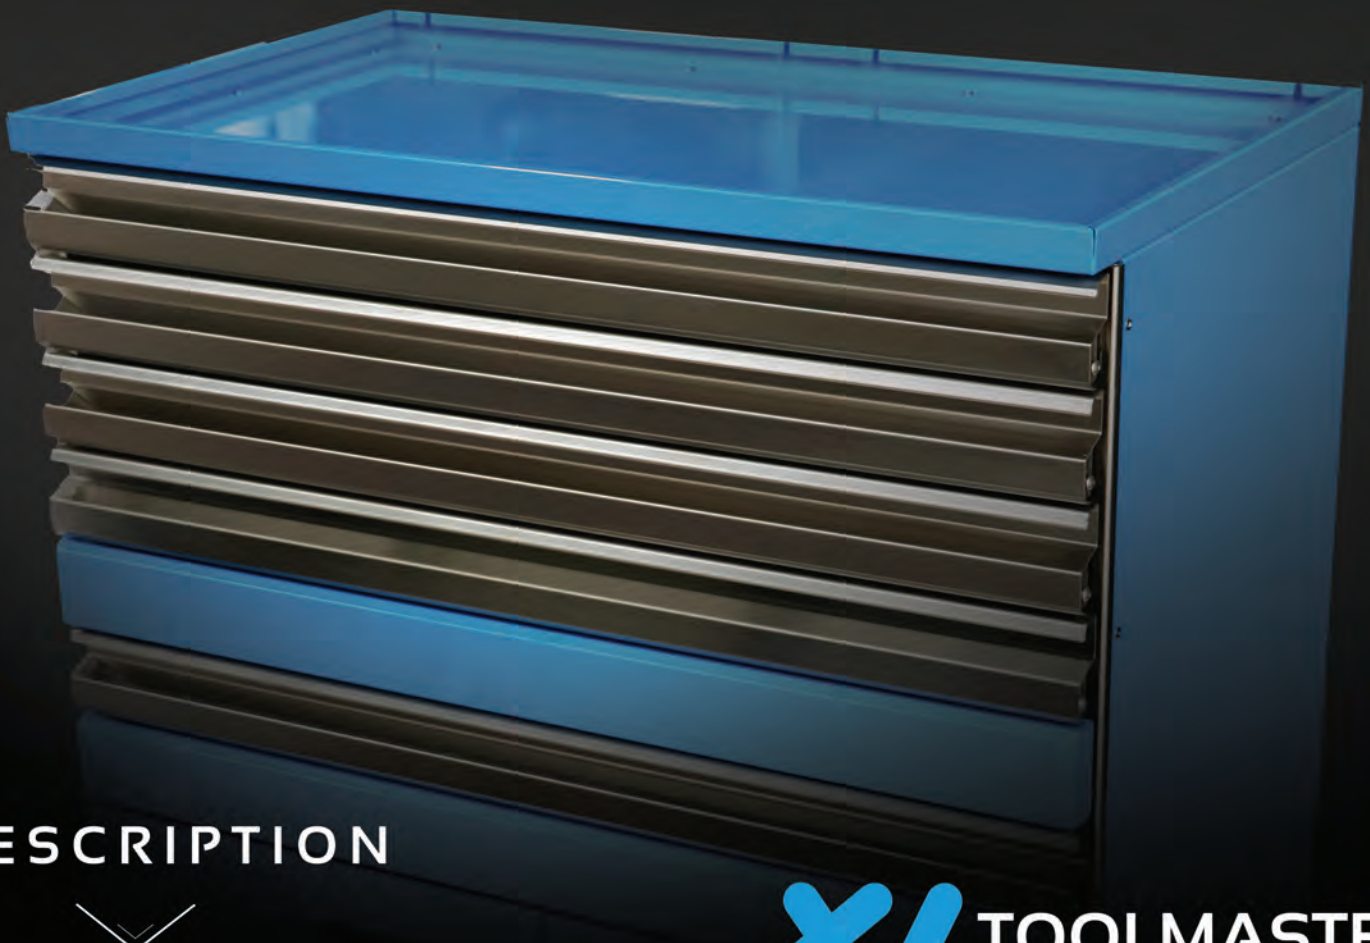

It's never easy finding a quality, high standard and long lasting tool drawer set that will stand up to the harsh road conditions we have here in Australia. With the many dirt roads with kilometres of corrugations, pot holes and other rough surfaces, you need a tool drawer that is not only going to stand up to such torture, but also be securely closed, yet easy to open when you need to access those tools. Combined with stainless steel handles and rigorous testing to simulate Australia's harsh driving conditions, this unit is fully designed, engineered and manufactured right here in Australia.

With The XL TOOLMASTER™ drawer system, opening the drawers is a simple one handed, ergonomic operation. Even though it easy to open, the advanced engineering behind the latch system allows for the drawer to be closed securely, without concern of it springing open while you drive along the old rustic roads of our great country.

Whether you need a fitted tool drawer system in your vehicle, or a standalone solution for your workshop, XL has you covered with the TOOLMASTER™ range.

The XL TOOLMASTER™ boasts a list of features that leave lesser quality tool drawers behind by a mile.

MADE IN AUSTRALIA - SOLD TO THE WORLD

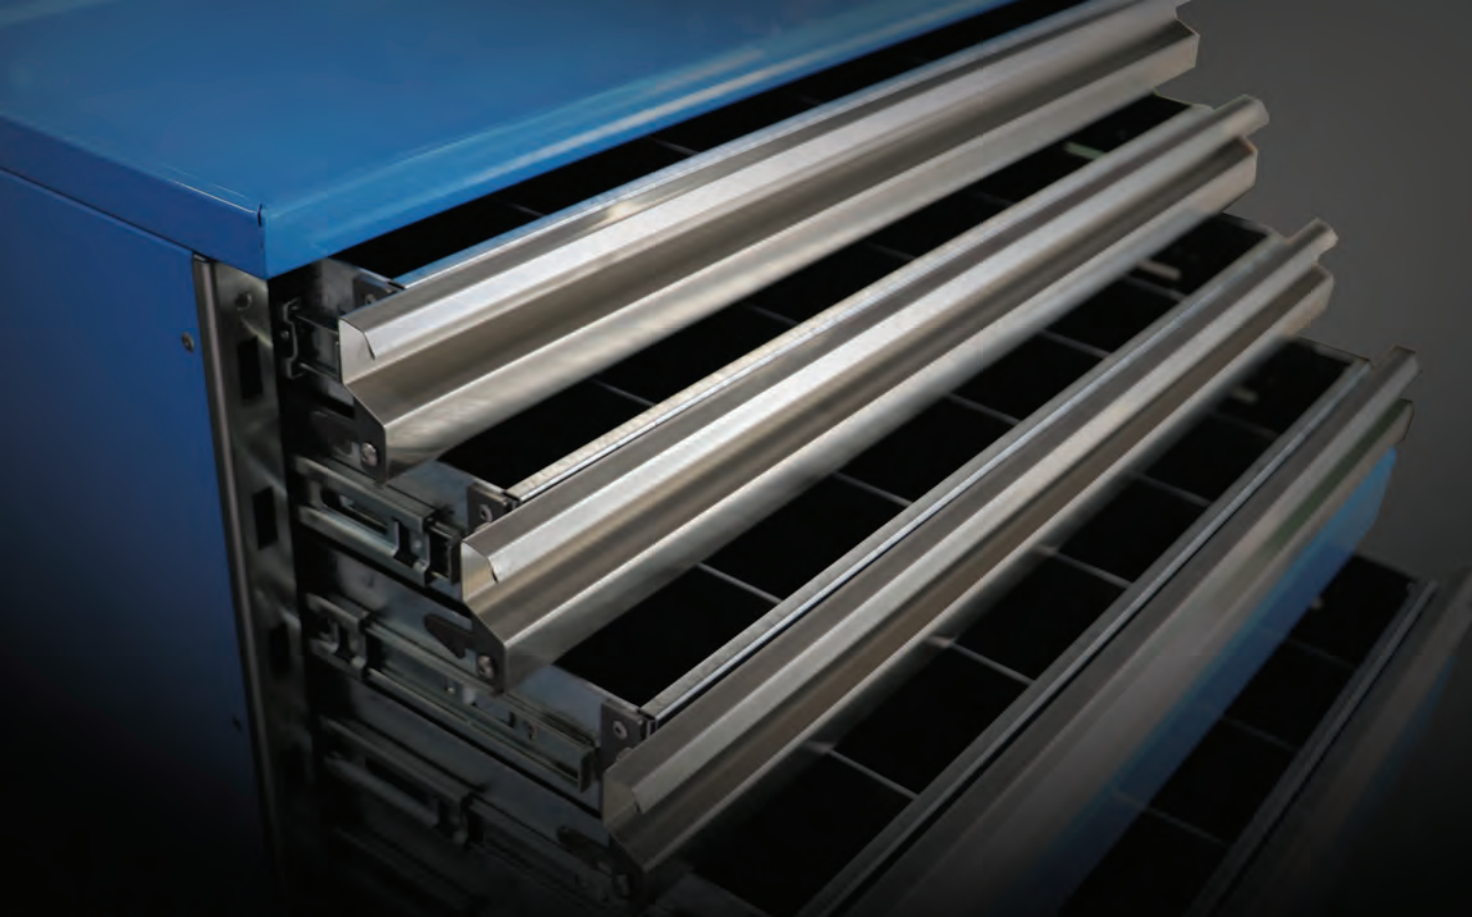

DESCRIPTION

XL TOOLMASTER™

- Ergonomic one-handed drawer closing/opening
